Journey/Memories Feature

How it works?

Once you start the journey, the map page will open and create a route on the map in real time. You can name your journey and also upload pictures using your dash cam - internal & external camera sat various places that may catch your interest - Example, Beautiful waterfall near Kemptly! Must try the Parathas at this new Dhaba opened in Ambala!

You can share your live journey with fellow riders so that you can track each other in real time.

You can also share a saved journey with friends and families so that they know what route you took and what all sights are worth looking out for!

The receiver do not need to have the application installed and can view from the web browser itself!

Live Stream Of All Cameras

The user can access the live video & audio feed of the vehicle interior cabin & the view of the road ahead, and can also hear conversations inside the vehicle. We also provide an option to record the ongoing video feed directly to your mobile phone by a single click of a button - this can then be shared via messenger apps and email.

Capture Photo

The user can capture & save static images of all cameras in real time with the location where the vehicle is. This gets uploaded on the cloud server. They can be downloaded and shared via messaging apps.

Capture Videos

Similar to Photo capture - video clips of 10 seconds of all cameras can be captured remotely while using the APP. The same can be shared.

Industry First Features - Scene 1

Social connectivity like never seen before

Imagine if the grandparent can not only track the location of their kids but also in real time also talk to the entire family while watching them live through the camera. All this without the family in the car having to touch their mobile devices while driving!

Industry First Features

Social connectivity like never seen before

Start Sharing Your Journey

Location is Mapped

Drop a Marker

View the whole Route

Scene 2

A travel vlogger documents his entire journey with the help of Tata.ev app for his fans so that they know exactly what to expect when they get out on the same trip!

Industry First Features - Scene 3

Social connectivity like never seen before

Due to workload, Neha leaves her office at 11:30 PM & is extremely worried to drive home alone at this hour. Sharing her limited time link to Tata.ev app, she calls her father to ensure if he can see her. She reaches safely & the link expires after set time.

Live Streaming Feature

Benefits

Remote live streaming features in a car dash camera offer several benefits:

- Real-Time Monitoring**: Users can monitor their vehicle remotely, providing peace of mind about its safety and security, especially in parking lots or unfamiliar locations.
- Emergency Response**: In case of accidents or emergencies, live streaming enables immediate assessment of situation, allowing for quicker response from emergency services, friends or family.
- Evidence Collection**: Live streaming provides a real-time evidence in the case of accidents, theft, or vandalism, facilitating insurance claims and legal proceedings.
- Lane Change**: The AI detects Lanes via the lane lines painted on the road and alerts driver of frequent lane changes via voice prompt.
- Forward Collision Warning**: The AI monitors the relative distance to the front vehicle and if the speed at which the current vehicle is travelling makes it a risk of colliding with the front vehicle an alarm is generated in the dash camera.
- Vehicle Tracking**: Allows users to track their vehicle's location in real-time, enhancing security and enabling efficient fleet management for businesses.
- Remote Assistance**: Users can remotely assist others in their vehicles, such as family members or employees, by providing guidance or support during their journey.
- Peace Of Mind**: It offers peace of mind to drivers & vehicle owners by providing constant access to their vehicle's surroundings and activities, even when they are not physically present.
- Pedestrian Collision Warning**: The front camera AI detects pedestrians and monitors their distance. If there's a risk of collision due to the vehicle's speed, a voice alarm alerts the driver via the dash camera.
- Too Close**: If a vehicle has stopped in front of the current vehicle & the current vehicle continues to not forward towards the stopped vehicle, a voice alarm is generated.
